The University of Texas at Austin	Bachelor of Business Administration, Management Information Systems Minor: Marketing	May 2025
--	---	----------

EXPERIENCE

Frontera Leadership Institute

Social Media and Marketing Coordinator; Brownsville, TX | Hybrid January 2025 – Present

- Executed 90% of social media strategies across LinkedIn, Instagram, and Facebook to boost visibility and engagement
- Aligned with program leadership to unify messaging with institutional goals and storytelling themes
- Developed content campaigns that highlighted student impact and increased Instagram engagement metrics by 500%
- Analyzed audience insights to refine outreach efforts and inform content scheduling
- Partnered with three student teams to promote events, updates, and leadership development opportunities

McCombs School of Business – Business Minor Office

Senior Peer Advisor & Business Minor Peer Advisor; Austin, TX August 2023 – May 2025

- Launched a comprehensive social media strategy to enhance program visibility and engagement
- Facilitated training sessions with peer advisors to effectively equip new advisors for student support
- Responded promptly and professionally to emails, addressing inquiries and providing information about various business minors
- Promoted the business minor program to non-business students, leading to a 14% increase in awareness and participation

McCombs Summer Institute

Marketing Teaching Assistant; Austin, TX June 2024 – July 2024

- Constructed and maintained a database of student performance metrics to identify the progress of 70 students during lectures
- Monitored student progress and provided one-on-one academic support to address individual learning needs

ACADEMIC PROJECTS

MIS 374 Business Systems Development – Solution Architect Spring 2025

- Analyzed the client's inventory management process to identify inefficiencies and propose automation solutions
- Designed an improved inventory tracking system to differentiate products for internal and external reporting
- Documented business requirements and functional specifications to support system implementation
- Built wireframes and solution flowcharts to visualize Shopify/Etsy integration and improve client usability
- Delivered final client presentation including prototype walkthrough and impact forecast

MIS 333K Web Application Development Fall 2024

- Engineered a dynamic website using C# and MVC framework, emphasizing functionality and user experience
- Partnered with a team to design and implement features, ensuring seamless integration and responsiveness
- Integrated form validation and authentication to enhance user experience and data security

Product Prodigy Institute – Data Analyst Fall 2023 – Spring 2024

- Synthesized research on pricing, accessibility, and tutor demand to inform the project's business strategy
- Interpreted survey results and waitlist data to identify user pain points and inform platform features
- Generated visualizations and financial forecasts for the pitch deck, contributing to funding readiness
- Formulated data-driven insights on tutor matching processes, enhancing user experience design
- Advised team leads on platform decisions by presenting data-backed recommendations during sprint reviews
